

BARRETT®

REC7™

Magpul® MOE® 6-position stock uses a premium chrome-silicone spring lock mechanism.

Nickel Teflon® coated anti-tilt bolt carrier with integral piston strike face.

Barrett Enhanced Piston Bolt and extractor reinforced for durability.

Rugged 17-4 stainless steel one-piece piston and operating rod.

Patented chrome-lined, fluted gas block increases reliability by eliminating carbon buildup in the gas cylinder.

Two-position, nitride finish gas plug is corrosion resistant.

Right-hand single-point Burnsed sling loop made from 6061 T6 and angled for charging handle clearance.

Magpul® enhanced trigger guard allows access to trigger with gloves.

Beveled magazine well for positive, rapid magazine changes.

Daniel Defense free-float rail system with three panel covers.

Hammer forged, chrome-lined barrel that is proofed and magnetic-particle tested.

Ships with two 5.56 NATO Magpul® PMAG® or two Barrett 6.8 SPC 30-round magazines.

REC7™

The Barrett REC7 is a powerful and reliable rifle styled in the familiar AR configuration. It's a no-nonsense rifle designed to answer the call for a low-maintenance, enhanced-reliability carbine. The REC7 exceeds expectations operators demand from today's new breed of piston-operated rifles.

The REC7 rifle's dependability stems from its innovative operating system. Using a minimum number of parts, the piston system separates heat and powder residue from the bolt carrier and trigger assembly. The rifle runs cool and clean, resulting in reduced maintenance requirements and increased endurance.

The patented, chrome-lined, fluted gas chamber design prevents excessive carbon buildup from impairing operation under adverse conditions. This in turn allows the one-piece, 17-4 stainless piston to transfer energy to the anti-tilt bolt carrier. Machined from a monolithic block of 8620 steel, the carrier features an integral piston strike face. There is no separate gas key to shoot loose, and the nickel Teflon® coating increases lubricity and simplifies cleaning. The Barrett Enhanced Piston Bolt is made from nickel Teflon coated 9310 steel. The bolt's gas ring-free design is easy to clean and operates smoothly. Reinforced at critical areas,

every bolt is proofed and magnetic-particle inspected to guarantee reliable performance.

At the heart of the system is the nitrided, two-position (suppressed/unsuppressed) gas regulator that retains the piston. The piston can be accessed through the gas block without removing the handguard, so optical sights or laser devices do not need to be re-zeroed after routine maintenance. The top of the gas block also has an integral 1913 rail, extending the rail length for mounting accessories or sights.

The REC7 rifle's forged 7075 aluminum upper and lower receivers are type 3 hardcoat anodized. The lower houses an ultra-dependable, mil-spec single stage trigger. The upper supports a free-floated, 16-inch hammer forged, chrome-lined barrel with M4 feed ramps machined into both the receiver and the barrel extension. A mil-spec A2 flash hider protects the muzzle.

The REC7, in 5.56 NATO and 6.8 SPC, can protect home, precinct or border with unsurpassed reliability. The REC7 is what you expect in a Barrett. Reliable. Powerful.

SPECIFICATIONS

Model: REC7

Caliber: 5.56 NATO and 6.8 SPC

Rifle Operation: Piston-Operated, Semi-Automatic

Overall Length: 33.375" (84.77 cm) with 16" Barrel

Barrel Length: Varies

Rifling Twist: 1 in 7" 5.56 NATO / 1 in 10" 6.8 SPC

Rifle Weight: 7.62 lbs (3.5 kg) with 16" Barrel

Safety: Manual Thumb Lever

Magazine: True 30-Round Capacity

MSRP: \$2,519.99
